YURT PLANNING GUIDE

THE YURT AND SITE

- We need a flat, firm, grassy and well-drained area to erect the yurt. A slight slope can be accommodated for but please discuss this with us prior to booking.
- Any long grass must be mown to 3 inches or less prior to our arrival to set up.
- The site must be free of livestock and animals to prevent damage to the yurt.
- We must be able to insert metal stakes at least 600mm into the ground. The customer must ensure there are no underground services that we might disturb.
- At least 1 metre of space must be available around the full perimeter of the yurt to allow space for guy ropes. An 18ft yurt (5.5 metres) requires a circular space of at least 22ft (6.7 metres). A 24ft yurt (7.3 metres) requires a circular space of at least 28ft (8.5 metres).
- The site should be sheltered from the wind as much as possible.
- Any low-hanging branches, overhead services or cables must not come within 2.5 metres of the yurt structure.
- A long wheelbase van must be able to access within 10m of the set-up area.
- A standard electricity supply is required for us to plug in the lighting.
- You need full permission from the landowner/venue to use the site.
- The site needs to be accessible at least one day before and after the event.

YOUR EVENT

- Make sure the yurt you choose is large enough to host all your guests in case of bad weather.

Magical spaces for events that don't cost the earth

- Do you want your guests to stand or be seated? Do you want room to dance? Larger tables, chairs and furniture will reduce the space available inside the yurt, so bear this in mind when deciding what furniture you need.
- If you want guests to serve their own drinks, we have a bar available with shelving for glasses and space for a fridge.
- In the colder months a heater is recommended to ensure your guests are comfortable. Speak to us about hiring one.

EXTRA TIPS

- Yurts are beautiful structures and don't need many decorations to make an impact. Lightweight decorations can be hung from the ceiling, just speak to us about what we recommend. We offer disco balls that we put up securely for you, we have two different sizes available.
- A Festoon Walkway provides a welcoming entrance to the yurt and stops feet getting muddy during wet weather. Talk to us about hiring one.
